

## INDEPENDENT MONITORING

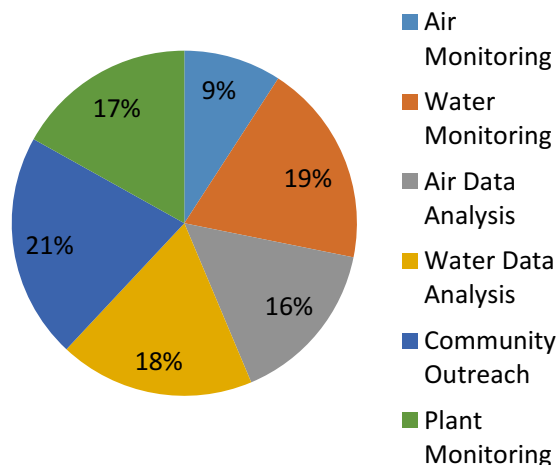

During August 2015, independent environmental monitoring of Eagle Mine's operations by the Superior Watershed Partnership (SWP) included split sampling, observation and review of data collected in and around the Eagle Mine and the Humboldt Mill. Monitoring included:

- Continued air quality monitoring in Powell Township at the CEMP Air/Meteorological Station
- Mine Permit Surface Water, and Groundwater samples were conducted at the mill for surface water as well as groundwater.
- Raspberries were gathered near the mine and mill sites for metals analysis as part of the CEMP program's Berry Contaminant Study.

## FINDINGS/RESULTS

- An air quality and meteorological report was created from the Big Bay fixed air station for the month of July. Results can be found on the CEMP Data Portal.

### CEMP Monthly Monitoring by Category August 2015

## PUBLIC OUTREACH/COMMUNITY INPUT

- SWP staff participated in CEMP technical and policy committee meetings.
- CEMP and Eagle Mine environmental monitoring data continues to be uploaded to the CEMP website. To view recently uploaded data visit the [CEMP Data Portal](#). Click [here](#) to view data from the Humboldt Mill.
