

INDEPENDENT MONITORING

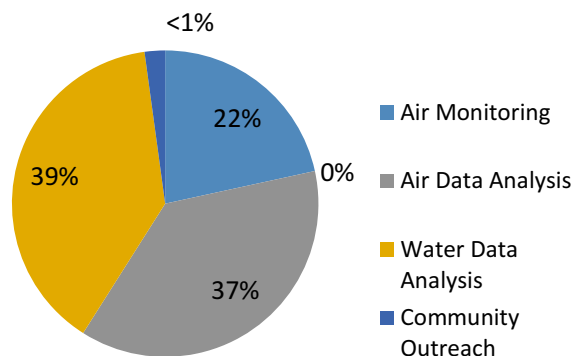

During December 2015, independent environmental monitoring of Eagle Mine's operations by the Superior Watershed Partnership (SWP) included air quality sampling, observation and review of data collected in and around the Eagle Mine and the Humboldt Mill. Monitoring included:

- Continued air quality monitoring in Powell Township at the CEMP Air/Meteorological Station
- Portable air quality monitoring along the haul route from Eagle Mine to the Humboldt Mill

FINDINGS/RESULTS

- An air quality and meteorological report was created from the Big Bay fixed air station for the month of December. Results can be found on the [CEMP Data Portal](#).
- CEMP and Eagle Mine environmental monitoring data continues to be uploaded to the CEMP website. To view recently uploaded data visit the [CEMP Data Portal](#). Click [here](#) to view data from the Humboldt Mill.

December 2015**

PUBLIC OUTREACH/COMMUNITY INPUT

- SWP staff participated in CEMP technical and policy committee meetings.

The portable air quality monitoring unit set up at a monitoring station near the Eagle Mine.
